Provo, UT 84606

Subject: Request for USBR contractual agreement

Dear Wayne:

As you know the USBR has installed telemetry and automation equipment on several non-federal facilities in Utah. This equipment and technology is important to the Division of Water Rights, particularly in water distribution. We rely on USBR equipment and professional support from the USBR Provo Area Office for maintenance, expansion and integration of this technology. The Division requests a contractual agreement with the USBR to affect future procurement of necessary equipment and services.

We appreciate the working relationship we have with your agency. We are requesting this contractual arrangement because it is our understanding it will be necessary in order to cooperate on non-federal projects. Your contact with our office on this process will be James Greer, Assistant State Engineer over Technical Services.

Sincerely,

Kent L. Jones, P.E.
State Engineer
